- Holding No. 309(4)/02 Vhobanipur, Sujanagar, Pabna, Bangladesh

Skills

- Electrical Software:** Xilinx, Vivado, MATLAB, Originlab, Proteus, 8086, AutoCAD
- Technical Skills:** Circuit Analysis, VLSI, PCB Design, Microprocessor and Embedded System.
- Programming:** VHDL, Basic Python, C, MATLAB, HTML
- Leadership, Teamwork**
- Languages:** Proficient in Bangla & English.

Honors-Awards

- Champion in Robo Soccer Competition organized by IEEE RUSBC
- 1st Runner-up in Pitch Competition at the IEEE Bangladesh Section Vitality Enhancement Summit 2025
- Mentorship in IEEE YESIST12

Training

- Completed a 2-week Industrial Technology Training on Electrical Engineering & Instrumentation at TICI-BCIC with A+ Grade. (4 October - 16 October, 2025)
- Computer Office Application Course, BTEB – A+ Grade. (Jan - Jun, 2017)
- Basic Web Development conduct by department of ICE, RU under EDGE project of Bangladesh Computer Council, ICT Division.

Languages

- Bangla
- English

CAREER OBJECTIVES

A highly motivated Electrical and Electronic Engineering student (expected graduate July 2026) with a strong foundation in VLSI design, embedded systems, and microcontroller programming. Passionate about semiconductor technology, chip design, and digital logic implementation, with hands-on experience in C, MATLAB, VHDL, and PCB design. Looking for opportunities to contribute to semiconductor/VLSI industries and grow as a skilled engineer.

Education

- Bachelor of Science in Engineering** 2021 - 2026
University of Rajshahi, Bangladesh
CGPA of 3.4 out of 4.00 - (till 7th semester)
Department of Electrical and Electronic Engineering (EEE).
- Higher Secondary School Certification** 2018 - 2020
Dhaka Residential Model College
GPA of 5.00 out of 5.00
- Secondary School Certification** 2016 - 2018
Sujanagar Govt. Pilot Model High School
GPA of 5.00 out of 5.00

Relevant Coursework

- VLSI small Project using Vivado:** Adder, Multiplexer, Counter, ALU design, TDMA, 4-to-16 Decoder, BCD to Seven-Segment Decoder, Magnitude Comparator, Edge-Triggered D-Flip-Flop with Asynchronous Reset, Frequency Divider, Signed 8-bit Adder/Subtractor
- MOS Device Theory:** Structure, threshold voltage analysis, characteristics.
- Integrated Circuit Fabrication:** CMOS logic gate design, pseudo-NMOS, dynamic CMOS, clocked CMOS, domino logic.
- Sequential Circuit Design:** Two-phase clocking, CMOS latches, flip-flops, shift registers.
- Memory Design:** SRAM, DRAM structures, timing considerations, array designs.

Volentering Experience

- General Secretary** December 2024 - March 2026
IEEE University of Rajshahi Student Branch
- Public Relations Coordinator** December 2023 - November 2024
IEEE University of Rajshahi Student Branch
- Vice-Chair** October 2024 - March 2026
IEEE AP-S RU SB Chapter
- Research and Analytics Incharge** March 2023 - February 2024
Rajshahi University Higher Study Club
